Summary

Software/Product Engineer with 4+ years building high-impact, scalable applications with C#, .NET Core, and React, alongside Python and Microsoft Azure. Owns the full application lifecycle end-to-end, from requirement gathering and client handling through deployment and maintenance. Specializes in Clean Architecture and microservices, translating complex business challenges into intuitive, maintainable software. Experienced deploying cloud services on Azure and Microsoft Azure certified.

Experience

Upwork Paris, France
Product Engineer & Developer *Mar. 2026 – Sept. 2026*

- Migrated legacy WCF to .NET Core APIs, unlocking access for 50,000 Oracle clients without code rewrites.
- Built ML.NET routing models processing 20K records, achieving 73.2% accuracy and halving manual assignments.
- Architected C#/VSTO add-ins for Outlook/OneNote, increasing execution speed 6x and user efficiency by 30%.
- Created a C# AutoCAD add-in for parametric staircase drawings, serializing geometry to JSON for rapid design.
- Led code reviews for 3 developers, reducing total lines of code while ensuring scalability and product excellence.
- Engineered a Python and OpenCV app to automate logo color extraction, streamlining a startup's printing workflow.
- Performed QA and security reviews on an AI secret-detection tool, uncovering critical bugs to harden the product.
- Engineered fuzzy-matching deduplication logic for Fromag.io, ingesting 2K+ records and flagging 20% as duplicates.

42 Paris Paris, France
Data Platform Engineer Intern *Sept. 2025 – Feb. 2026*

- Engineered BigQuery dbt models with CTEs to accurately calculate overlapping campus attendance metrics.
- Integrated Great Expectations in Dagster pipelines for BigQuery anomaly detection with automated Slack alerts.

Constellation Software Bangalore, India
Software Engineer *Aug. 2022 – Sept. 2024*

- Automated daily report generation using Azure Functions and a C# API, eliminating 5+ hours of weekly work.
- Decreased UI load times by 2000ms by optimizing React rendering, lazy loading, and migrating to TypeScript.
- Accelerated feature development by 25% by migrating front-end state management to Redux.
- Developed scalable, high-performance RESTful APIs in .NET Core utilizing SOLID design principles.
- Reduced QA feedback loops and improved application reliability by establishing comprehensive NUnit testing.

Wipro Ltd Bangalore, India
Software Engineer *Aug. 2021 – Aug. 2022*

- Overhauled a .NET Payment History UI, driving a 21% increase in user task-completion rates and positive feedback.
- Built scalable full-stack .NET, React, and Next.js components to streamline complex data-aggregation workflows.

Education

EPITA School of Engineering and Computer Science Paris, France
M.Sc. in Data Science and Analytics (GPA: 14.63/20) *Sept. 2024 – Mar. 2026*

RV College of Engineering Bangalore, India
B.Tech (CGPA: 8.5/10) *Sept. 2018 – June 2021*

Technical Skills & Languages

Technologies: React.js, .NET Core, ASP.NET, C#, TypeScript/JavaScript, Redux, API RESTful, FastAPI, Docker, SQL Server, Oracle, Dapper, .NET 8
Cloud & Data: Azure (Functions, App Service), AWS, Apache Kafka, Airflow, Dagster, dbt, Big Query, Postgres
Methodologies: CI/CD, Agile/Scrum, SOLID, TDD, Clean Architecture, Git, multi-threading, Algo Trading, Automation
Languages: English (C1 IELTS), French (B1 TCF, B2 in progress)
