

VISHAL GOULI

Paris, Île-de-France, France | Software Engineer

(+33) 780 71 96 23 | vgouli1998@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Chess](#)

PROFESSIONAL SUMMARY

Product-focused **Software Engineer** with 4+ years of experience building scalable applications and data-driven systems using **.NET, React, and Python**, now transitioning into a **Product Engineer** role. Combines strong software engineering and data engineering expertise to design user-centric solutions, drive product decisions with data, and deliver impactful, end-to-end features.

PROFESSIONAL EXPERIENCE

Freelance

Remote

Product Engineer

Jan 2026 – Present

- Spearheaded the development of a software add-in alongside a team of two developers, delivering the project in just 4 weeks cutting the estimated timeline by **50%** and saving the client **\$20,000**.
- Translated complex client business requirements into clear, actionable technical specifications, streamlining the development lifecycle and improving team velocity.
- Devised and executed a strategic task execution plan, successfully reducing post-deployment bugs by **90%** in an existing legacy application.
- Redesigned the application architecture utilizing the **MVVM** pattern to efficiently manage a UI-heavy interface, halving development time and minimizing regression bugs.
- Applied **Test-Driven Development (TDD)** methodologies to enforce rigorous code quality, maintainability, and reliability standards throughout the project.

42 Paris

Paris, France

Data Platform Engineer

Sept 2025 – Feb 2026

- Engineered a real-time monitoring system using **Apache Kafka** and **Python** to detect student performance anomalies, triggering automated interventions that reduced dropout rates by **20%**.
- Engineered an automated billing pipeline using **dlt** for seamless data ingestion and **dbt** for robust transformations, orchestrated via **Dagster** event-driven jobs, reduced billing errors by **10%** and saved **20 hours** of manual effort per cycle.
- Directed risk assessment through multiple PoCs and built unified dashboards using **Superset** to visualize complex campus data and student analytics.

Freelance Software Engineer

Remote

Microsoft Office .NET Developer

Aug 2025 – Dec 2025

- Built an Outlook add-in to categorize emails and calendar items, assign priorities, trigger notifications, and persist data in a MySQL database, improving user efficiency by **30%** by consolidating all workflows into a single interface.
- Developed **VSTO** add-ins for OneNote and Outlook using C# and .NET, enabling paragraph bookmarking, calendar creation from notes, and workflow automation.
- Created a virtual desktop productivity application allowing seamless movement of applications across virtual environments to improve multitasking efficiency.
- Designed custom Office Ribbon UI and background schedulers for OneNote backups and productivity enhancements.

Constellation Software

Bangalore, India

Software Engineer

Aug 2022 – Sept 2024

- Integrated a **VSTO Word Add-in** to enable seamless check-in and check-out functionality within client documents, automating version control workflows and saving approximately 20 hours per month.
- Automated report generation using **Azure Functions** and a custom C# API client, reducing manual reporting workload by 60% and improving data accuracy.
- Developed 20+ high-performance RESTful APIs using **.NET Core** with a focus on scalability and maintainability.
- Optimized **React UI** performance by 80% through lazy loading and initial render optimization, while migrating core components to **TypeScript**.
- Migrated app state management to **Redux**, improving component data handling and reducing development time by 25%.
- Developed interactive **SSRS reports** for advanced business analytics.
- Strengthened code reliability through NUnit-based and integration tests, decreasing QA feedback loops by nearly 35%.

Wipro Ltd

Bangalore, India

Software Engineer

Aug 2021 – Aug 2022

- Designed **Python automation tools** for data extraction and processing, reducing manual intervention by 70%.
- Improved user experience by redesigning Payment History modules in a .NET application, resulting in a 20% increase in user task completion rates.
- Built scalable components for internal crowd-sourcing platforms using .NET and React.

EDUCATION

EPITA School of Engineering and Computer Science <i>Master of Science in Data Science and Analytics (GPA: 14.63)</i>	Paris, France Sept 2024 – Mar 2026
RV College of Engineering <i>Bachelor of Engineering (CGPA: 8.5/10)</i>	Bangalore, India Sept 2018 – June 2021

PROJECTS

Fake News Detection System <i>Python, ML, NLP, Streamlit</i> - Designed a Machine Learning and NLP-driven system to classify news statements as true or false using the LIAR dataset. - Achieved 99% accuracy by enhancing prediction models with real-time web data integration and credibility scoring. - Deployed an interactive Streamlit web app.	 GitHub
Music Recommendation System <i>FastAPI, Airflow, Streamlit</i> - Built a recommendation engine using collaborative filtering, achieving 85% precision. - Automated workflows using Apache Airflow DAGs. - Developed a FastAPI REST service.	 GitHub
Pothole Volume Detector <i>OpenCV, Arduino, Computer Vision</i> - Designed a Computer Vision system to detect and measure pothole volumes. - Enhanced detection with grayscale and edge detection techniques.	 GitHub

TECHNICAL SKILLS

Languages: Python, C#, JavaScript/TypeScript, Java, SQL
Web Technologies: React.js, Redux, .NET Core, ASP.NET, FastAPI
Data Engineering: Apache Kafka, Airflow, Dagster, dbt
Cloud & DevOps: Azure, AWS, Docker, CI/CD
Methodologies: Agile, SOLID, TDD, Clean Architecture

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)
Udemy: Data Structures and Algorithms
FreeCodeCamp: Web Development
IBM Certified: Python for Data Science
